Seed Starting Potting Mix

Enriched with Miracle-Gro® Plant Food

Seed Starting Formula

- Feeds instantly to bolster strong root systems
- Excellent for germinating vegetable, flower, and herb seeds-- and for rooting leaf, stem, and root cuttings

- A special blend of sphagnum peat and perlite
- Provides ideal conditions to help seeds and cuttings grow quickly in containers
- Phosphorus added to help maintain vigorous growth
- Sphagnum peat and perlite provide improved drainage -- helps prevent disease, root rot, and sickly plants

User-Friendly Package

- No Waste...Easy to Open...Resealable
- This stand up bag has a resealable feature that helps prevent spills, while keeping the mix moist and fresh

Easy To Use Instructions

For seed starting:

1. Place a minimum of 2 inches of Miracle-Gro® Seed Starting Potting Mix in clean* pots, trays, flats, or other suitable containers that have plenty of drainage.
2. Wet the mix to settle the particles and prevent their floating before planting the seeds.
3. Plant seeds according to package directions.
4. Thoroughly wet seeds and potting mix.
5. Place the container in a warm location (70° to 80°F) away from direct sunlight and furnace registers. Keep mix constantly moist to the touch by periodic misting. A clear, ventilated plastic bag placed over the container may help conserve moisture. Remove the plastic immediately after seeds start to germinate.
6. After seeds germinate and plants emerge and form first true leaves, it is important to fertilize them with Miracle-Gro plant food following package instructions.
7. Shortly after first true leaves form, but before plants reach significant size, the plants should be transplanted into larger "growing" containers with Miracle-Gro Potting Mix. This does two important things. First, transplanting stimulates more vigorous rooting. Second, Miracle-Gro Potting mix is more suitable for growing plants because of its higher nutrient levels and better drainage characteristics than this Seed Starting Mix. **Seed Starting Potting Mix is not recommended as a growing media beyond seedling establishment.**
8. Reseal bag between uses to lock in freshness.

3. Using a clean* utensil, make a small hole in the mix and place the cutting in the hole. Firm the mix around the cutting. Repeat for each cutting. NOTE: Some leaf, stem, and root cuttings are more easily established if they are first dipped in rooting compound. Follow the directions provided with the rooting compound for best results.
4. Place the container in a warm location (70° to 80°F) away from direct sunlight and furnace registers. Keep mix constantly moist to the touch by periodic misting. A clear, ventilated plastic bag placed over the container may help conserve moisture. Keep leaves from touching the plastic. Remove the plastic immediately after new roots have formed.
5. After they have formed new leaves, transplant the new plants into larger pots or outdoor containers using Miracle-Gro Potting Mix.

*Important Notice: To avoid poor germination or rotting of cuttings, it is imperative that clean pots and other tools be used. If using cleaning agents to achieve this, rinse items thoroughly with tap water before use.

When to Repot Plants and Flowers:

- If plant is "rootbound" (roots wind around inside of pot)
 - If roots grow out of drainage holes
 - If bottom leaves turn yellow or drop off
 - If potting mix becomes gray or faded; exceedingly hard or crusty
- For best results, repot once a year (early spring or early fall)

For beautiful flowers, plants and vegetables in containers try:

- Miracle-Gro® Enriched Potting Mix
- Miracle-Gro® African Violet Potting Mix
- Miracle-Gro® Moisture Control™ Potting Mix
- Miracle-Gro® Cactus Potting Mix

For beautiful in-ground flowers, plants and vegetable gardens try:

- Miracle-Gro® Garden Soil For Flowers & Vegetables
- Miracle-Gro® Garden Soil For Trees, Shrubs & Ornamentals
- Miracle-Gro® Garden Soil For Roses

INGREDIENTS

This product is formulated from 80-90% horticultural-grade sphagnum peat, perlite, fertilizer and a wetting agent.

Net Weight 2.5 lb (1.13 kg)

Seed Starting Potting Mix, 0.05-0.01-0.05

Guaranteed Analysis	F 1144
Total nitrogen (N)	0.05%
0.005% ammoniacal nitrogen
