You’re Done! What’s Next?

- People or pets may re-enter lawn once granules dry.
- Your lawn will be protected from grubs.
- Jet-Pack® application may result in slight discoloration of lawn. Be sure to rake the soil to prevent puddling of the granules.

Other Things You Should Know
- Apply weekly to early summer.
- Do not allow to watered areas.

Quick Start Guide

TURF DAMAGING PESTS

Grubs and other kiled insects can cause extensive damage to lawns by feeding on grass and its roots. Infested turf turns brown and is easily pulled up by hand. GrubEx® prevents turf damage by killing grubs when they are young before they can cause damage to your turf.

Annual use can help control Japanese Beetle infestations!

STOP THE DESTRUCTIVE CYCLE!

Scotts® GrubEx® kills grubs as they develop, BEFORE they cause damage to your lawn! Apply GrubEx® spring to early summer.

Spring

Grubs come out of winter hibernation and start to eat your lawn’s roots. By late spring, grubs enter the pupa stage to transform into beetles.

Summer

Adult beetles surface to feed on your garden and lay eggs back in your lawn. Eggs hatch into new grubs, which will begin to feed on your lawn’s roots.

Fall

Between the summer stress and the feeding grubs, your lawn can be severely damaged. After feeding in the fall, grubs will hibernate during the winter and resume the destructive cycle in the spring.

Don’t forget to feed your lawn – a strong root system will also help your lawn defend against grubs!

PRECAUTIONARY STATEMENTS

Read all directions and precautions carefully.

AVISOS DE PRECAUCIÓN

READ ALL DIRECTIONS AND PRECAUTIONS CAREFULLY.

STORAGE AND DISPOSAL

Pour into thechosen applicator, mix thoroughly, and water in. Do not apply directly to wate
